

## Haltenbanken Stratigraphic Database

The Halten Terrace has been a focus for exploration for over 30 years with numerous oil and gas fields discovered, extending from Draugen in the south to Linerle in the north plus with the prolific Smørbukk, Lavrans Morvin and Kristin Field areas in Quad 6506. The aim of the Haltenbanken Stratigraphic Database is to provide a unified stratigraphic evaluation extending across the whole of the Halten Terrace and incorporating all of the main field areas and discoveries. Well selection includes either the discovery well or an appraisal well with a view to providing a representative section for each of the field areas. Consequently a flank area well with a more complete stratigraphic section was selected in preference to a truncated crestal well in certain fields.

The Haltenbanken Stratigraphic Database comprises of a 45 well dataset covering the full stratigraphic section from Tertiary – Triassic. The study utilises the Ichron sequences which are calibrated with the Mid Norway lithostratigraphic nomenclature.

### Deliverables include;

- 🌀 **Stratigraphic framework and zonation scheme.**
- 🌀 **Local lithostratigraphic scheme applied to all wells.**
- 🌀 **Stratigraphic summary chart for each well including age, lithostratigraphy, sample data points and biostratigraphical marker events, all set against the wireline/MWD logs.**
- 🌀 **Correlation panels highlighting regional thickness trends, stratigraphic breaks and hiatal surfaces within the context of the regional structural elements.**
- 🌀 **Tabulated stratigraphic sequence depths for each individual well.**
- 🌀 **ODM deliverable.**
- 🌀 **Digital data export of stratigraphic sequences and lithostratigraphic boundaries.**

### Well list

6406/1-1	6406/9-1	6407/9-9	6507/5-2	6507/11-9
6406/1-2	6407/1-2	6506/6-1	6507/5-3	6608/10-2
6406/2-1	6407/1-3	6506/11-2	6507/7-2	6608/10-4
6406/2-5	6407/4-1	6506/11-7	6507/7-3	6608/10-6
6406/2-6	6407/6-3	6506/12-1	6507/7-13	6608/10-8
6406/2-7	6407/7-1	6506/12-3	6507/8-4	6608/10-9
6406/3-2	6407/7-6	6507/2-2	6507/11-3	6608/10-11S
6406/3-3	6407/7-7	6507/3-1	6507/11-6	6608/11-2
6406/5-1	6407/9-1	6507/3-3	6507/11-8	6608/11-4
